

Stop Bush! Stop WWII!

The world is closer to WWII than ever. Until today no one has provided a convincing answer as to “why?” The purpose of this Open Letter is:

- 1. To expose the agenda behind the Bush Administration’s plan to launch WWII.**
- 2. To Prevent the execution of this plan through this public exposure.**
- 3. To enable the people of America and the world to compare the events of the coming months with this analysis and take the appropriate actions.**

The Bush Administration’s Goal: Launching World War III

Under the pretext of fighting terrorism, the Bush Administration has been preparing the USA and the world for WWII. Already the Iraq war was designed as the launching pad for a war with weapons of mass destruction. The obvious reason why no post-war plan had been prepared was that this war was never intended to end. For the last three years the Bush Administration has been alternately threatening Iran, North Korea and other countries with a military strike. Moreover, in September 2005 the Bush Administration announced a change in its military doctrine to specifically include a nuclear first strike – even without any UN mandate.

The recent war in the Middle East was nothing else than a substitute war designed and controlled by the Bush Administration. Its deliberate brutality was intended to escalate this war into an open military conflict between Iran and the U.S. thus beginning WWII. But this plan failed. As this war dragged on and casualties rose, world opinion eventually terminated it. Now is the time to answer urgent questions.

Why Does the Bush Administration Seek to Launch World War III?

Parallel to the global military escalation, the Bush Administration has domestically made every preparation to turn U.S. democracy into a dictatorship. Again under the pretext of fighting terrorism a series of empowerment laws have been passed, including the Patriot Act, the Homeland Security Act, the Biodefense Act and others.

The common denominators of these acts are:

1. The abolition of most U.S. civil rights.
2. The granting of direct access to executive and legislative power for the pharmaceutical and petro-chemical industries - the drug and oil cartels.

The only step needed to activate this entire set of empowerment legislation is a world war with the ensuing martial laws.

Protecting the Multi-Trillion Dollar Drug Investment Business

The outrageous step of preparing WWII cannot be explained by the desire to gain access to oil fields. Only the foreseeable economic loss of catastrophic proportion can trigger such a desperate action. This is the imminent collapse of one of the largest investment industries: the multi-trillion dollar pharmaceutical drug business with disease.

The scandals from the deadly side-effects of Vioxx, Baycol and other widely used drugs are already threatening the economic basis of the largest drug makers in the world. Now the survival of the entire pharmaceutical industry is at stake. Constructed as an investment business based on patented drugs, this industry has been unmasked as a giant organized fraud: it promises “health” but its entire existence depends on the continuation and expansion of diseases as multi-billion dollar drug markets.

To protect its business with patentable drugs from competition by effective, non-patentable therapies, the stakeholders of the pharmaceutical business have consistently excluded research with non-patentable natural substances. Moreover, they have strategically barred basic knowledge of biological science in this field from entering the medical practice to fight global diseases including heart disease,

cancer and immune deficiencies. If this basic knowledge had been implemented into medicine when it became available decades ago, neither the scope of most diseases nor the size of the drug investment business would have reached today’s magnitude.

Now that the deceptive strategy of this “business with disease” has been unmasked, its entire credibility is at stake and with it the survival of multi-trillion dollar markets of patented drugs. The desperate effort to prevent the largest financial collapse in history is the driving force behind the plans for WWII.

Now World War III Is No Longer Possible!

The next months will see the Bush Administration threatening military action and wars against Iran, North Korea and other countries. However, with the publication of this information the launch of WWII will no longer be possible because:

1. The agenda behind these war plans has now been revealed.
2. The governments of the world can no longer be coerced by the Bush Administration into such wars – regardless of the pretext.
3. The governments of the world can now establish a new world parliament. As a precondition to lasting world peace, this global

Matthias Rath M.D. is the world-renowned scientist who led the breakthrough in the natural control of major diseases. His colleague and friend, the late Nobel Laureate Linus Pauling stated: **“Your discoveries threaten entire industries. One day there may even be wars just to prevent this breakthrough from being widely accepted. This is the time when you need to stand up!”**

Dr. Matthias Rath

On March 16, 2003, 4 days before the Iraq War started, Dr. Rath published an Open Letter in the New York Times stating that it was the Bush Administration’s plan to escalate it into a “war that includes the use of weapons of mass destruction.” This strategic plan was made public with the intention to prevent its implementation. Today’s Open Letter goes one step further: it reveals the economic motives behind the ongoing WWII agenda of the Bush Administration.

government has to be founded on the principle “One Country – One Vote.”

4. The people of America have the opportunity to peacefully remove those politicians who continue to threaten world peace.
5. The people of the world now have the chance to significantly reduce today’s most common diseases, including heart disease, cancer and immune deficiencies by terminating the investment business with these diseases.

Matthias Rath
