

# PHARMA- CARTEL WAR PLANS CAN NO LONGER BE ACHIEVED !

In recent years the pharmaceutical industry has been exposed as a multi-trillion dollar 'investment business with disease' the future of which is dependent on the continuation and expansion of diseases.

## I. THE GOAL OF THE PHARMA-CARTEL:

Cementing the global control of its 'investment business with disease'. The very existence of the pharmaceutical industry is currently threatened. Damage claims from the deadly side-effects of one single drug are bringing down Bayer, the flag ship of this industry. The ensuing 'domino effect' would inevitably cripple this largest investment sector on earth. At the same time, scientific advances in non-patentable natural health offer effective, safe and affordable alternatives to the multi-trillion dollar market of patented drugs.

## II. THE MEANS TO ACCOMPLISH THIS GOAL:

- Establish control of the global interests of the drug industry through corporate protectionist laws and by curtailing civil rights. This control can only be imposed by drastic legal measures worldwide, such as granting immunity to drug companies, restricting patient rights to liability claims, curtailing freedom of information and eliminating one of the most important civil rights - free access to effective, safe, non-patentable and affordable natural health. All this is currently happening in the USA.
- Creating the psychological state of fear - on a global scale - to set the stage for these laws - worldwide. This global fear can only be created during a war that includes the use of weapons of mass destruction such as nuclear, biological or chemical weapons.

## III. PRECONDITIONS TO ACHIEVE THIS GOAL:

- International support. Such a hazardous strategy can only work if it is backed by international law or organizations such as the United Nations. Lack of this support inevitably causes failure of this strategy because the psychological horror of a nuclear or biological war can no longer be justified or blamed on others. Any war outside international law can no longer be used to justify curtailing civil rights and will turn against those who instigate it.
- Absolute secrecy. The most important precondition for this strategy to succeed is secrecy. Under no circumstances must it be revealed in advance.

Since 1). there is no international legitimization for this war and 2). the pharma-cartel's plan is now public, both preconditions failed and their goal can no longer be achieved. Starting a nuclear, biological or chemical war will sacrifice millions of people without the pharma-cartel reaching its goal!

Every family in America, Great Britain and anywhere else in the world should be aware of that and act immediately!

MATTHIAS RATH, M.D.  
OPEN LETTER TO GEORGE W. BUSH

**T**his War is neither a vocation nor a 'mission from God' - this is Your War!

Your War is against the interests of six billion people!

Your War is against the declared will of over 180 countries of the United Nations!

Your War is against international law! It is neither morally nor ethically justified!

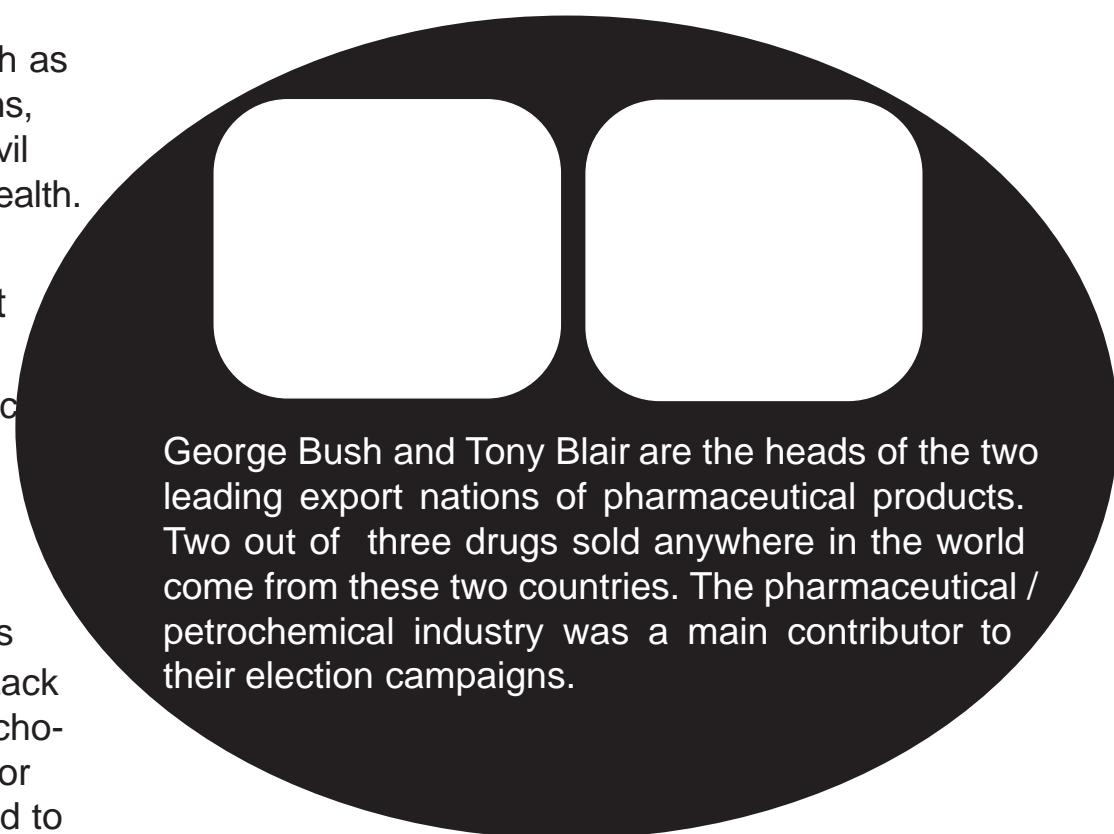

Your War is against the will of the overwhelming majority of the American people, many of whom approve only because you sent their sons and daughters to the battlefield. No one believes the polls!

Your War is against the interests of every American because it will be fought with weapons of mass destruction. In an attack war involving nuclear or biological weapons - that does not have the support of the world community - you as the instigator carry all responsibility. No matter what weapons of mass destruction explode, no matter where and on which side - the American people, the entire world will point at you.

**B**ut the World also knows the true motifs for Your War: This War is in the interests of the pharmaceutical and oil industry!

Your War serves the interests of the investment group behind both these industries, namely the Rockefeller-financed Trilateral Commission\* who paved the way for your political career. Your War is Their War !

\* New York Times, September 13, 1998  
'Is There a Role for Another Bush?'

George Bush and Tony Blair are the heads of the two leading export nations of pharmaceutical products. Two out of three drugs sold anywhere in the world come from these two countries. The pharmaceutical / petrochemical industry was a main contributor to their election campaigns.

## LESSONS FROM HISTORY

One day, those politicians and executives supporting this war - against any mandate by international law - may be held accountable by courts, including the World Court for War Crimes in The Hague that was inaugurated on March 11 this year.

Now, no one can say 'I did not know' or 'I just followed orders'.

# We Are No Longer Willing To Sacrifice Health and Peace!

Open Letter by Matthias Rath, M.D.  
to the American People and to the People of the World!

Dr. Matthias Rath is the physician and scientist who led the breakthrough in the natural treatment of cardiovascular disease and cancer. He is a member of the New York Academy of Sciences and other renowned scientific organizations. 10 years ago, the late Dr. Linus Pauling, recipient of the Nobel Prize in Chemistry and Peace stated: "Your discoveries are so important for millions of people that they threaten entire industries. One day there may even be wars just to prevent this breakthrough from being widely accepted. This is the time, when you need to stand up!" - This time is now!

"As the physician and scientist who was privileged to contribute discoveries that make the eradication of cardiovascular disease by natural means possible and save millions of lives I raised my concerns in an Open Letter published in the New York Times on February 28. I raise my voice once again on behalf of millions of people who are deprived of life saving natural health information, which threatens the multi-trillion dollar pharmaceutical investment business of patented drugs.

## PEACE NOT WAR

My Open Letter published in the New York Times one week ago revealed for the first time:

- **The largest corporate benefactor** of the September 11 tragedy was the multi-trillion dollar pharmaceutical industry. In August 2001 Bayer's Baycol scandal was the beginning of a 'domino effect' threatening the survival of this entire investment industry. Similarly to the tobacco industry, individuals and governments were beginning to sue drug companies for billions in damages. After September 11, all media attention shifted away.

- **The close connection** between the pharmaceutical/petrochemical industry as the single largest donors for the election campaigns of George Bush and his all out efforts to protect and promote the interests of this investment industry.

- **The main agenda** behind the war escalation is to regain control by the pharmaceutical industry and establish its long-term global monopoly for the "investment business with disease". This can only be achieved by eliminating civil rights - including freedom of information and free access to natural health. Wars - especially the use of weapons of mass destruction - can accomplish all that.

## HEALTH NOT DISEASE

Unbeknown to most people, the very same industry has been leading another war for decades. According to the *Journal of the American Medical Association* (April 15, 1998) in this 'war' every year more than 100,000 people die and more than 1,500,000 are hospitalized from the side effects of harmful prescription drugs.

In this 'war at home' people are harmed in several ways. They are promised 'health' but they receive drugs that do not cure, only cover symptoms. Moreover, millions of patients and entire economies are financially ruined for the sake of the huge profit margins of this investment industry. All of this is no surprise, because the continued existence of diseases and their expansion is a precondition for further growth of the drug industry. Prevention and eradication of diseases undermines the investment nature of this business.

With its current 400 billion dollar 'Medicare' plan, the Bush Administration is making further concessions to the pharmaceutical 'investment business with disease' at the expense of millions of patients.

The cornerstones of a new patient-oriented, effective and affordable health care are available:

## LESSONS FROM HISTORY

Mankind is currently going through one of the greatest advances in its history. Two out of three of today's diseases can largely be eradicated if the scientific knowledge currently available in the area of natural *non-patentable* health is implemented in any health care system.

Over 400 years ago, a similar quantum leap took place in history. During medieval times 80% of the people living in Europe were illiterate. The invention of the printing press together with the translation of the bible into spoken languages allowed millions of common people to learn to read and write.

Knowledge was power and the rulers at that time did not want to share their power with the people. They wanted to preserve their feudal economic privileges and met the 'liberation from illiteracy' with utmost brutality. In the '30-Year War' (1618-1648) they destroyed half of Europe and killed millions of people in an attempt to bring back Medieval Times. All was in vain because the people no longer wanted to live in illiteracy and dependency.

Today we are facing a 'liberation' of similar magnitude - but global in its scope. The possibility to liberate mankind from cardiovascular disease, cancer and many other diseases by natural, non-patentable means threatens the very existence of the multi-trillion dollar pharmaceutical investment industry.

As we are all witnessing, today's 'economic rulers' are not willing to give up their economic privileges voluntarily. Just as they did 400 years ago they are willing to sacrifice the lives of thousands, even millions of people in their own decline.

There is one difference worth noting. Centuries ago, wars were fought with pitchforks and muskets. Today they are fought with weapons of mass destruction including nuclear weapons.

Millions of people living today in America and in every other country of the world have to make a decision: Do we really want this to happen? If not, the time to act is now!

## Effective, Safe and Affordable Health Care for the American People and the People of the World

### 1 Prevention and Eradication of Diseases Instead of Treatment of Symptoms.

Eighty percent of pharmaceutical drugs currently prescribed to patients have no proven efficacy - at the very best, they alleviate symptoms without addressing the root cause of the disease. Future health care systems will focus on prevention, treatment of root causes and eventually the eradication of diseases.

### 2 Healthy Body Cells Are a Precondition of Good Health.

Health and disease in the human body are determined at the level of cells. The main cause of cellular dysfunction is the insufficient intake of micronutrients essential for optimum cellular metabolism and their optimum daily intake is a precondition for health. This new understanding of Cellular Health can be summarized in three principles:

### 3 Cellular Health Principle #1: Optimum Supply of Cell Energy.

Essential nutrients are required for maintaining cellular energy metabolism. An optimum supply of these nutrients is a prerequisite for the prevention of irregular heartbeat (energy deficiency in myocardial cells responsible for regular heartbeat), heart failure (energy deficiency in myocardial cells responsible for contraction of the heart muscle and blood pumping), and similar conditions.

### 4 Cellular Health Principle #2 - Optimum Connective Tissue Stability of Soft Tissues.

Approximately one half of the body's proteins are composed of collagen, elastin, and other connective tissue molecules. Their production is regulated by vitamin C, and the amino acids lysine and proline, which are the main building blocks of these proteins. The human body does not produce vitamin C or lysine and, therefore, is dependent on an

optimum lifelong supply of these nutrients. The application of this basic knowledge will decrease the incidence of today's most common health problems such as heart attack, stroke, cancer and many other diseases to a fraction of their current rates.

### 5 Cellular Health Principle #3 - Optimum Connective Tissue Stability of Bone Tissue.

The stability of the skeletal system and our teeth is determined by the optimum production of collagen molecules (facilitated by vitamin C, lysine, and proline) and the proper introduction of essential minerals (such as calcium and magnesium) and trace elements. The systematic implementation of this knowledge will largely prevent widespread diseases such as osteoporosis (bones), caries (teeth), and periodontitis (gums).

### 6 Independent Health Information and Education Is the Key to Health.

Although we are at the beginning of the third millennium, it is still a little-known fact that the human body does not produce vitamin C or lysine, two key nutrients in determining human health and disease. This is the result of the pharmaceutical industry's ongoing efforts to suppress this information. The dissemination of basic health information and the implementation of health education from childhood to advanced age is the foundation of the new health care system.

### 7 Comprehensive Research in Natural Health Is a Cornerstone of a New Health Care System.

Currently, medical research is being driven by the share prices of drug companies, not the health needs of people. The implementation of natural health and Cellular Health principles saves billions in health care costs. These billions in savings should be reinvested into further research in natural health. It is a fact that many more diseases are connected to cel-

lular deficiencies in essential nutrients. The introduction of comprehensive natural health research programs as part of public health policies would greatly accelerate the elimination of diseases.

### 8 Implementation of the Scientific Principles of Cellular Health.

Each year, millions of people world wide die from diseases that can be prevented and controlled by natural means. The implementation of the scientific principles of Cellular Health into healthcare policies will save millions of lives and billions of dollars in public and private funds. These dollars could then be used to also address other basic needs of society.

### 9 Elect Politicians Who Defend the People's Right to Natural Health.

Politicians who continue to support legislation that restricts the dissemination of natural health information endanger the health and lives of the people who elected them. Politicians who continue to obstruct natural health rather than support it will be held accountable. All governments have a responsibility to protect the lives of their citizens and promote effective, safe and cost saving health measures in their countries.

### 10 Ban the Pharmaceutical Industry's 'Business With Disease,' Not the Dissemination of Natural Health Information.

To protect their billion-dollar market with largely ineffective drugs, pharmaceutical companies are trying to fight off their fiercest competition: effective, safe, and affordable essential nutrients. To that effect, the pharmaceutical lobby has been abusing the United Nation's "Codex Alimentarius" (Food Standard) Commission and many other national and international political bodies. Maintaining and expanding diseases, as the basis for the growth of the investment 'business with disease,' will be prohibited by law.

With the multi-trillion dollar pharmaceutical investment industry as the largest corporate benefactor behind the current 'war on terrorism' revealed and in broad daylight for the world to see, what are the options left for this interest group? When the first nuclear or biological weapons detonate - who will be blamed? Who will accept the arguments that civil liberties need to be abandoned and press freedom abolished?

This interest group and its political stake holders have to realize: Whatever they do now - including any military action - their goal is now publicly exposed and can no longer be achieved.

All of us, the people of America, the people of the world now have the great opportunity and responsibility to help build a healthier and more peaceful world. Now its up to us!

**"The Time to Protect Our Health and Our Lives Is Now!"**

**Matthias Rath, M.D.**

# Mr. Bush -

## This War Is Not a Sign of Strength, But of Desperation!

### Open Letter by Matthias Rath, M.D. to US-President George Bush and to the People of the World!

“As the physician and scientist who was privileged to contribute discoveries that make the eradication of cardiovascular disease by natural means possible and save millions of lives, I am asking you: could it be that this war is not about fighting 'terrorism' or conquering oil fields but about protecting the largest investment industry - the pharmaceutical industry - from collapse?”

Millions of people worldwide are waking up to the fact that the pharmaceutical industry is an investment industry based on the continuation of diseases.

The survival of the pharmaceutical investment industry is threatened by four main factors:

**1 Unsolvable business conflict.** The nature of the pharmaceutical investment industry is the 'business with disease'. Its basis is the patentability of new synthetic drugs that merely target symptoms but do not eliminate the root cause of diseases. The continued existence of diseases and their expansion is a precondition for further growth of this industry. Prevention and eradication of diseases undermines the economic basis of this business.

**2 Unsolvable legal conflicts.** A wave of patient litigation against the deadly side effects of pharmaceutical drugs threatens to cripple this industry. An end to this litigation is not in sight, since drug side effects are the fourth leading cause of death in the industrialized world (*Journal of the American Medical Association, April 15, 1998*). Side effects of pharmaceutical drugs kill more Americans every year than WWII and the Vietnam War combined.

**3 Unsolvable ethical conflicts.** The pharmaceutical industry faces an intrinsic conflict between maintaining profits from patent fees and meeting the health needs of people. In the developing countries, the profitability of drugs has been a major factor contributing to the spread of AIDS and other epidemics.

**4 Unsolvable scientific conflicts.** Advances in vitamin research, cellular medicine and natural health allow the control of today's most common diseases. These safe, effective and affordable natural therapies focus on the prevention and eradication of diseases - not only the alleviation of symptoms. This fact and the low profitability of these non-patentable natural approaches, threaten the economic base of the pharmaceutical investment business.

While many events led up to the current crisis, none was as threatening to the survival of the entire pharmaceutical industry as the scandal around Bayer's cholesterol lowering drug Baycol.

In August 2001 Bayer had to withdraw its leading new drug Baycol because more than 50 people had already died from taking it and more than 6 million patients were at risk from the deadly side effects of rhabdomyolysis (dissolving of muscle tissue). British phar-

**September 11, 2001**

2,600 innocent people died in this tragedy. The same number of people die from side effects of prescription drugs every ten days (Source: JAMA, April 15, 1998).

maceutical multinational Smith Kline Beecham (SKB) was Bayer's global marketing partner.

Bayer - a century old flagship of the pharmaceutical industry - and British SKB - the world's second largest drug maker - were faced with crippling lawsuits and other devastating economic consequences:

- Over 7,000 Patients taking Baycol from around the world have filed individual and class action lawsuits against these drug companies.
- Government authorities filed criminal lawsuits against the executives of these pharmaceutical companies for gross negligence. These executives knew about the deadly side effects while continuing to press for higher dosages.
- Investors lost billions of dollars in share value, threatening the very survival of these companies.

The Baycol scandal was only the beginning of a 'domino effect'. Within weeks many multinational drug companies were faced with lawsuits from patients suffering severe side effects from taking other pharmaceutical drugs (beta blockers, calcium antagonists, estrogen replacement, etc).

In summary, the pharmaceutical industry was facing the same grim fate as the tobacco industry, with entire States and Nations suing these companies for billions in damages. In August 2001, the end of the pharmaceutical industry seemed closer than ever.

But then everything stopped on September 11, 2001. On this day global attention shifted away from the crisis facing this industry.

Since then, the main goal of the Bush administrations has become to secure the survival of the pharmaceutical industry through:

- Attempts to overcome the unsolvable scientific conflicts. The Bush administration is spearheading an international effort by the pharmaceutical industry to outlaw natural health therapies world-wide by abusing the United Nations 'Codex Alimentarius' (food standards) commission.
- Attempts to overcome the unsolvable ethical conflicts. The recent 'relief' program for fighting AIDS in developing countries is a 15 billion Dollar subsidy program for drug makers. While neglecting effective natural therapies to fight immune deficiencies this plan maintains the economic dependency on drug companies.
- Attempts to overcome the unsolvable legal conflicts. A key provision of the 'Homeland Security Act' grants immunity to the pharmaceutical companies for present and future product liability claims for vaccines. Further plans for 'medical litigation reform' include limiting product liability lawsuits against drug companies.
- Attempts to overcome the unsolvable business conflict. This conflict cannot be solved because it would destroy the very nature of the pharmaceutical "business with disease".  
The only option for this industry's survival are protectionist laws that artificially maintain control of the pharmaceutical investment business and its global health monopoly.

The war against Iraq is not primarily about fighting 'terrorism' or conquering oil fields. It is part of a long-term strategy of the pharmaceutical/petrochemical investment groups to create the psychological state of fear to maintain global control.

Long term international conflicts, wars - even the use of weapons of mass destruction - can be used to achieve this goal and suppress any opposition.

This war is not a sign of strength - but of desperation.

Dr. Matthias Rath is the physician and scientist who led the breakthrough in the natural control of cardiovascular disease and cancer. He is member of the New York Academy of Sciences and other renowned scientific organizations. 10 years ago, the late Dr. Linus Pauling, recipient of the Nobel Prize in Chemistry and Peace stated: "Your discoveries are so important for millions of people that they threaten entire industries. One day there may even be wars just to prevent this breakthrough from being widely accepted. This is the time, when you need to stand up!" - This time is now.-

#### LESSONS FROM HISTORY

70 years ago, this week, an event shocked the world and set the stage for the last World War. On February 28, 1933 the German parliament building, the Reichstag, was set on fire.

The official version that 'terrorists' had led the attack was soon questioned abroad. Today it is a fact that the Reichstagsbrand was deliberately used as a pretense and that the 'empowerment laws' following this event had been prepared in advance.

Following the burning of the Reichstag:  
• civil rights were abolished,  
• empowerment laws were enacted, including a "Homeland Security Act" ("Schutz von Heim und Reich").

The Reichstag-Assault in 1933 provided the legal platform for 12 years of dictatorship and WWII. Its main benefactor was IG-Farben, the largest European petro-chemical Cartel seeking control of the oil and chemical industry worldwide.

**February 28, 1933**

- 70 Years Ago -

The German Parliament building, the Reichstag, was set on fire. This event delivered the pretense for the transformation of a democracy into a dictatorship on behalf of the largest European corporate Cartel.

In the Nuremberg War Tribunal in 1946/47 this Cartel was tried for 'conquest', 'robbery' and 'slavery' and - as a result - it was dismantled into Bayer, BASF and Hoechst.

This War Tribunal established that without these corporations, World War II would not have been possible. US-Chief Prosecutor Telford Taylor stated: "If their guilt is not brought to the daylight, they will do even more harm in future generations."

Then and now millions of decent people are in danger of being misled by their own governments. And those who do not learn the lessons from history are doomed to live through it again!"

**“Mr. Bush, in the name of mankind: Stop This War!”**

**Matthias Rath, M.D.**

**More Information: [www.dr-rath-health-foundation.org](http://www.dr-rath-health-foundation.org)**

# Make Health - Not War!

Open Letter by Matthias Rath M.D.

to US-President George Bush  
to the Leaders of the World  
to the American People  
and the People of the World

"On the eve of a possible world war, I am calling upon you to stop any military action! Make Health-Not War! This war is not in the interest of the people of the world but of special interest groups that include - beside the oil industry - also the pharmaceutical industry. Or was it a coincidence that the pharmaceutical industry - not the oil industry - was the main sponsor of the 'war agenda' during the last US-elections in November 2002?"

At the beginning of the 21st century mankind stands at the cross roads. Advances in the field of natural health will save millions of lives but threaten the very existence of the multi-trillion dollar pharmaceutical investment industry, that is based on patents and the continuation of diseases. This entire industry is in a battle for survival. A prolonged international crisis and the curtailing of civil rights play right into their hands.

The people of America, the people of the world need a strategic plan to combat these special interests, to stop funding them and to ensure long-term peace and health for this planet. This plan was presented at the World Summit in Johannesburg in August 2002 and is now being implemented in more and more countries.

Dr. Matthias Rath is the physician and scientist who led the breakthrough in the natural control of cardiovascular disease and cancer. He is member of the New York Academy of Sciences and other renowned scientific organisations. Already 10 years ago, the late Dr. Linus Pauling, recipient of the Nobel Prize in Chemistry and Peace stated: "Your discoveries are so important for millions of people that they threaten entire industries. One day there may even be wars just to prevent this breakthrough from being widely accepted. This is the time, when you need to stand up!" - This time is now.

## Natural Health for All by the Year 2020 is Possible!

**1** Health is a basic human right. Every person is entitled to make use of this right without any restriction. Public institutions and private organizations are to be held accountable for providing life-saving health information to the people of the world. The obstruction of the right to essential health information for everyone constitutes a crime against humanity.

**2** Today, health is not available to every human being for good reasons. These include social injustice, military conflicts and others. Another significant reason is the fact that the most profitable industry on earth, the pharmaceutical industry, is an investment industry based upon the existence and continuation of diseases - despite declarations to the contrary. Low-cost prevention, treatment and elimination of diseases threaten this multi-trillion dollar pharmaceutical "business with disease".

**3** Most efforts to improve health on a global scale have failed thus far. The World Health Organization's effort "Health for All by the Year 2000" could not reach its goals because it did not distinctly separate itself from the global "business with disease." It focused instead on administrative healthcare changes, rather than taking advantage of global advances in medicine.

**4** Advances in the field of natural medicine have been made over recent

years that will reduce the incidence of common diseases in the industrialized countries as well as in the developing world, to a fraction of their current frequency. The primary cause of the world's most common health conditions is a chronic deficiency of micronutrients, essential for optimum cellular energy metabolism as well as optimum connective tissue stability.

**5** In the industrialized world, the leading causes of death are heart attacks, cancer, strokes, diabetes and high blood pressure. Using the available knowledge in nutritional research and cellular medicine, these health conditions can be significantly reduced and hundreds of millions of lives can be saved.

**6** In the developing world, two billion people suffer from deficiencies in micronutrients, according to United Nations Organizations. Avitaminosis is a leading cause of disease resulting in blindness in millions and promoting infectious diseases -including AIDS- in hundreds of millions by compromising cellular defense mechanisms in their bodies. Taking advantage of the knowledge of nutritional medicine already available today, billions of lives can be saved in the developing world.

**7** The eradication of today's most common health problems is dependent on one factor only: how fast the information

about this breakthrough in natural health can be spread. Whilst the scientific knowledge to combat these diseases effectively is available and the essential nutrients to prevent these health conditions can be produced at low costs, in any quantity, anywhere in the world, the dissemination of this life-saving information to the people of the world is being obstructed.

**8** The pharmaceutical industry tries to protect its global drug market by outlawing natural remedies. Effective, non-patentable and affordable natural health approaches threaten the very existence of the pharmaceutical industry. The multi-trillion dollar global pharmaceutical market is dependent on synthetic drugs that allow an excessively high return on investment based on the patentability of those drugs. To secure the continued existence of the pharmaceutical industry as the most profitable industry on earth, large corporations embarked on a global battle to outlaw the dissemination of natural health information. To that effect the pharmaceutical industry allied with the United Nations "Codex Alimentarius Commission" and other national and international bodies.

**9** The people of the world face one of the largest challenges in human history. The right to health and life for billions of people is being threatened by the profit interests of a few shareholders. The goals of

these two interest groups are incompatible by their very nature. Similarly, in the battle to save human lives against the profits from patented drugs, every government, every public and private institution has to take a decision on which side they stand. And they will be held accountable by history.

**10** The goal "Health for All by the Year 2020" is in sight. What is needed immediately is a worldwide effort to promote the dissemination of natural health benefits in every country.

**I call upon**

- The United Nations Organizations and other international organizations to promote natural health policies by all means available;
- Politicians in every country to implement natural health as an integral part of national health policies;
- Health professionals to utilize natural health approaches to improve the health of your patients.

I call upon every man and woman to spread this life-saving information in order to protect your life and that of millions of others.

Matthias Rath, M.D.

World Summit,  
Johannesburg 2002

## Many Countries Are Implementing This Breakthrough:

The World Summit was attended by over one hundred Heads of State. Many countries acted on this plan and adopted natural health policies to improve the health of their people. Prominent examples are:

- **Jordan.** All school children and students will receive free vitamin supplementation composed of Vitamin C, B-Vitamins, Vitamin D, Folic Acid and Iron.
- **United Arab Emirates.** A 1.8 billion dollar Natural Health City will be established in

Dubai to study and promote alternative health programs for the people in the Arab Emirates.

- **South Africa.** The South African government recognized the critical role of micronutrients for strengthening the immune system in combating infectious diseases like tuberculosis and AIDS. Bread will be vitamin enriched nationwide to protect the poorest part of the population from malnutrition.
- **Other African Countries.** The sub-Saharan

countries Lesotho, Malawi, Mozambique, Swaziland, Zambia and Zimbabwe and Angola are establishing similar community-based nutrition programs nationwide.

- **UN-Food and Agricultural Organization (FAO)** launched an international campaign in November 2002 "Food is the first medicine for HIV/AIDS".

tries use scientific information already available in the fight against cardiovascular disease, cancer and infectious diseases - including AIDS. E.g., studies published in the Proceedings of the US National Academy of Sciences prove that vitamin C alone is able to inhibit HIV virus activity by more than 99% (!).

Further information and copies of the studies can be found and downloaded from the website below.

In implementing these programs, these coun-

## Why the Pharmaceutical Industry Is Backing a War Agenda:

Every country that adopts a national policy based on effective natural therapies is a nail in the coffin of the pharmaceutical 'business with disease'. In the global battle between natural health and the financial interests of the drug companies there can be only one winner.

That is why the pharmaceutical interest groups have placed their lobbyists in key political positions:

- George Bush and Tony Blair are the heads of the two leading export nations of pharmaceutical products. They are also the most aggressive war advocates.

- Donald Rumsfeld has been the CEO and Board member of several pharmaceutical multinationals (Searle, Gilead etc.). Now he is the fiercest war advocate in the Bush administration and controls where and how long the bombs fall.

The following facts now also appear in a new light:

- The pharmaceutical industry was the single largest industry group sponsoring the war agenda of the Bush administration during the November 2002 elections.

- The first 'benefactors' from the 'Homeland Security Act' where the drug companies, receiving guaranteed immunity for any side effects of their products!

- In his State of the Union Address, President Bush does not support effective natural health, but promises a 400 billion dollar (!) subsidy program for the drug companies under the cover of Medicare.

- And even the surprising 15 billion dollar support for AIDS treatment in Africa will primarily benefit the drug companies - not

the people of Africa. Despite effective and affordable alternatives they are kept in dependency of the pharmaceutical Cartel."

“ Make Health - Not War! “ Matthias Rath, M.D.
